High School Diploma

EXPERIENCE

Software Developer
First Oceanic Property Management
2019-Now
A web and mobile platform solution for managing BPO and residential properties in Philippines. I learn to participate in all phases of software development lifecycle for the team is in growing stage.

Software Engineer
Campaigntrack Inc.
2018-2019
A web platform solution for advertising/marketing services for real estate properties in Australia. I participated in both support and development team and learn to code with convention for maintainable applications.

Software Developer - Intern
MsgMe Wellness Enterprise
2017-2018
A startup mobile application platform that provides wellness services. I worked like a freelance developer from the company's website to the mobile application.

WORKS

Online Library System
A web application platform that manages information circulating in a school library with barcode technology and accepts payment for penalties online.

Water Billing System
A windows application platform that manage billing record for tap water consumptions in a subdivision. We just show the billing statement using forms.

Management Information System
A windows application platform that manage information circulating in a security agency. We were focus on documentation case study for this project. We only have implemented C.R.U.D operations for the system.

Maze Game
A simple maze game application for children that will challenge them complete basic English sentences/phrases.

Simple Android Applications
Simple applications with nothing special. It was just made for practice of native UI development and API Integration.
